

Key Ingredients

Magnesium

Research shows that when Magnesium levels are low, blood pressure is higher. Studies indicate that Magnesium supplementation not only produces significant blood pressure lowering effects but also cholesterol and triglyceride lowering effects.

Garlic

Many studies have proven Garlic supplementation to be beneficial in promoting healthy blood pressure, cholesterol levels and triglyceride levels. In addition, the intake of this superfood decreases the risk of developing heart disease and promotes healthy circulation.

Hawthorne

Hawthorne is considered a cardiovascular tonic. Studies indicate that Hawthorne has the ability to safely lower blood pressure while helping to maintain and promote heart function and a healthy circulatory system.

Potassium

Many studies show that supplementing with Potassium can produce significant reductions in blood pressure in individuals with elevated blood pressure. This effect is also seen in those who do not respond to blood pressure lowering medications.

Other Nutrients

Elevated blood pressure can lead to a variety of cardiovascular problems including heart attack and stroke. Over time untreated high blood pressure can even lead to kidney failure and blindness. Blood Pressure Formula combines nutrients and herbs like Calcium, Diosmin, Juniper Berry and Cayenne which all have been shown to enhance heart function, circulation and provide protection against the damaging effects of elevated blood pressure.

"I was on two medications and my doctor wanted to add a third. I started **Blood Pressure Formula** instead and now my blood pressure is finally under control" - Sally

"My doctor kept threatening me that I had to take blood pressure medication. I started **Blood Pressure Formula** instead and now that my blood pressure is normal, he said keep taking it. We're both happy." - Mike

"My doctor said I had to stay on blood pressure medicine for the rest of my life. I hated the side effects of memory loss and impotence. I only take **Blood Pressure Formula**, feel great and my blood pressure is normal." - Steve

Blood Pressure Formula

Supplement Facts

Serving Size: 1 Tablet

Amount Per Serving	%Daily Value	
Calcium (as citrate)	100 mg	10%
Magnesium (as oxide)	100 mg	25%
Potassium (as chloride)	99 mg	3%
Garlic (0.5% extract)	100 mg	†
Diosmin	75 mg	†
Olive Leaf (15% extract)	75 mg	†
Hibiscus Flower (trionum powder)	50 mg	†
Hawthorne (4:1 extract)	45 mg	†
L-Taurine	40 mg	†
Beta-Sitosterol Complex (96% soy phytosterols)	35 mg	†
Horsetail Leaf (herb powder)	30 mg	†
Valerian Root (herb powder)	30 mg	†
Juniper Berry (herb powder)	30 mg	†
Cayenne (capsicum 40M HU/G)	25 mg	†
Rutin	25 mg	†
Betaine HCL	25 mg	†
Rauwolfia Serpentina	10 mg	†
Blueberry Juice Powder	10 mg	†
Grape Juice (4:1 extract)	10 mg	†
Raspberry Juice Powder	5 mg	†

†Daily Value not established.

Other Ingredients: Magnesium stearate and stearic acid.
Contains Soy (plant sterols)

BLOOD PRESSURE FORMULA

- ✓ Backed by science
- ✓ Doctor recommended
- ✓ All natural
- ✓ Synergistic formula of vitamins, minerals and herbs

VITA LOGIC
VITAMINS THAT MAKE SENSE!

Who Should Take Blood Pressure Formula ?

- Do you or anyone in your family have high blood pressure ?
- Is your blood pressure elevated despite taking blood pressure medication ?
- Do you have other risk factors for heart disease, including diabetes, high cholesterol levels or are you overweight ?
- Have you noticed that your blood pressure has started to rise over the past few years ?
- Do you experience excess stress at work or at home ?
- Do you smoke cigarettes ?
- Do you regularly take medications that have high blood pressure as a side effect, like decongestants, anti-inflammatory drugs, birth control pills, or steroids ?

The more you answered yes, the more Blood Pressure Formula may help you.

What is Blood Pressure ?

When the heart beats blood is pushed out of the heart and into the arteries, creating pressure in these vessels. The force of the blood pushing against the walls of these arteries is called blood pressure. Blood pressure is at its highest when the heart beats, pumping the blood. This is called systolic pressure. When the heart is between beats, blood pressure falls. This is the diastolic pressure. Blood pressure should remain relatively stable throughout the day. It is considered normal when the measured values are below 120/80 mm Hg.

When blood pressure stays elevated over time it is called high blood pressure or hypertension. Referred to as the "silent killer," hypertension presents with few to no symptoms. High blood pressure is dangerous because it causes the heart to work harder than necessary and increases the risk of heart disease and stroke. It can also lead to congestive heart failure, kidney disease and even blindness.

It is estimated that one in three American adults has high blood pressure. This disease can affect persons of any age, gender or race. Fortunately high blood pressure is easily detectable and responds well to natural supplements, which are safer and without harsh side effects. Clinical trials have repeatedly shown that reducing blood pressure decreases deaths from stroke and heart disease; slows the progression of kidney disease; and prevents progression to more severe hypertension.

Because of the damaging effects high blood pressure can have, many individuals are choosing to be proactive by taking natural supplements like Blood Pressure Formula, to help prevent and manage this "silent killer." This advanced blend contains ingredients that have been proven to have positive effects on blood pressure, circulation and total cardiovascular health.

What Makes Vita Logic's Blood Pressure Formula Unique ?

Formulated by a team including researchers, scientists and medical doctors, the nutrients and herbs contained in Blood Pressure Formula are specifically combined to promote healthy blood pressure levels as well as enhance overall cardiovascular health.

Contains proven ingredients backed by research:

Results indicate that Magnesium supplementation lowers BP in hypertensive [patients] and this effect is greater in subjects with higher BP. Our study supports the usefulness of increasing Magnesium intake as a lifestyle modification in the management of hypertension. -- *Hypertension*

These data indicate that Potassium supplementation resulted in a substantial reduction in systolic BP. Our findings suggest that increased Potassium intake may play an important role in the prevention and treatment of hypertension. -- *Journal of Hypertension*

These results show that Garlic is beneficial in reducing blood cholesterol, triglyceride levels and systolic blood pressure. Experimental results show that Garlic may beneficially affect two risk factors for atherosclerosis-- hyperlipidemia and hypertension. -- *Prostaglandins, Leukotrienes, and Essential Fatty Acids*
